On-Farm Composting

Friday & Saturday October 19-20, 2012

NSAC is pleased to offer **On-Farm Composting** as part of our **Learn2 Farm** program. This practical training course is based on sound science and techniques, to help grow your farm!

During this 2-day course, participants will learn:

- The basic biological processes involved in making compost.
- How to select feed stocks and develop successful recipes.
- How to determine the best use for the final product.

Our Approach

The course will include a combination of speaker-led sessions and hands-on activities using the facilities at Dalhousie Agricultural Campus and the Bioenvironmental Engineering Centre (BEEC).

Participants will be under the expert guidance of **Dr. Gordon Price**, Assistant Professor and Innovative Waste Management Research Chair, and **Mr. Cory Roberts**, Innovative Waste Management Research Technician.

How to Apply

Pre-registration required.

Please complete the information on the back of this brochure, and return it along with the tuition fee to Continuing Education.

Registration Deadline

Monday October 1, 2012

Tuition: \$316.25 (\$275.00 + HST)

About Continuing Education at Dalhousie Agricultural Campus

Continuing Education at Dalhousie Agricultural Campus specializes in capturing opportunities and building relationships to deliver extended learning programs in agriculture.

Continuing Education has a longstanding history at Dalhousie Agricultural Campus of specializing in programs to engage adult learners. Collaboration with community groups, businesses, associations and the public sector are built on mutual goal setting and respect.

We offer programs with clear outcomes developed to the highest industry standards.

As adult educators, we recognize the rich background of knowledge and experience that adult learners bring to each learning experience. We incorporate opportunities to set personal goals, share experiences and apply learning to real-life situations.
