TERMS AND CONDITIONS

These terms are applicable to all animals described within this Catalog except where specifically noted for Yearling Bulls described within this Catalog or Replacement Heifers described within this Catalog.

CONDITIONS OF SALE

Yearling Bulls - Should any bull, after reaching the age of 14 months, fail to prove a breeder after being used for a reasonable period of time on cows known to be breeding, the matter shall be reported in writing to the consignor who shall then have the privilege of a reasonable period of time in which to prove the bull a breeder before refunding the purchase price or making other settlement satisfactory to the buyer. In order to qualify as a breeder, a bull must be able to perform natural service.

Yearling Bulls - Transportation of any animal(s) being returned to the consignor shall be paid by the shipper. The Sale Management acts as an agent only and under no circumstances will it accept financial responsibility between buyer and seller for any health, breeding or other problems that may arise following the Sale.

CONSIGNOR STATEMENTS

All statements have been prepared by the consignor. The MBTS does not confirm or adopt the statement.

ERRORS

Every attempt has been made to properly describe each lot. Neither the Management nor the compilers of pedigrees assume any responsibility for errors, which may occur in the Catalogue.

ANNOUNCEMENTS

Any announcements from the auction stand will take precedence over any printed matter.

BIDS

Every animal is pledged to absolute sale (unless withdrawn for just cause prior to being offered for sale), but the Sale Management shall have the right to set a floor price applicable to all animals offered for sale and to reject any bid which it considers irresponsible. Every animal will be sold to the highest bidder.

DISPUTES

In case of disputes, bidding will be reopened between the parties involved. If no further bidding is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in matters will be final.

PAYMENT

Cash, a satisfactory cheque or credit card (***There will be a processing surcharge administered to all credit card payments***). Payment shall be made to the clerk. Sale and release of the animals will be given only when satisfactory settlement has been made by the buyer.

CERTIFICATE OF REGISTRY

Yearling Bulls - All animals eligible for registration or recordation are recorded or will be recorded in the Herd Book of the Breed Association. Transferred registry certificates will be forwarded to the purchaser of each purebred animal. All transfers will be completed on the day of the sale to the buyer of record.

Replacement Heifers - Only purebred animals specified are eligible for registration. Ownership transfers are the responsibility of the consignor.

RISK

All animals are at the purchaser's risk as soon as sold.

ACCIDENTS

The Sale Management, the auctioneer, nor the owners of the cattle will in any way be responsible for the condition of the grounds or the behavior of the cattle being sold and disclaim any liability in the event of personal accident or property loss.

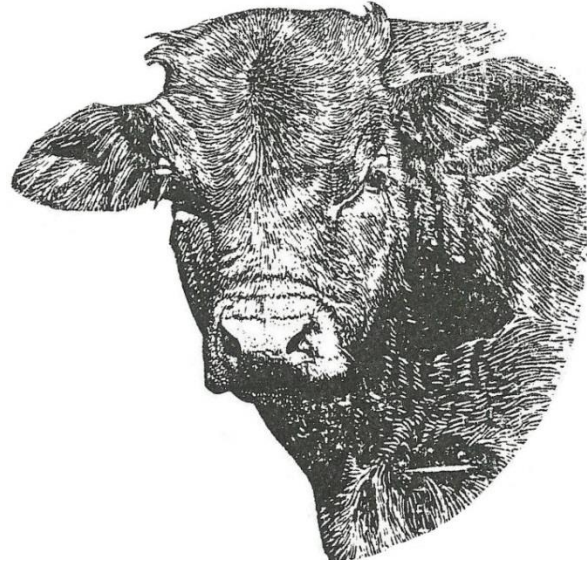

COMMISSION FEE

Bulls - A 8.5% selling commission and a transfer cost will be charged to the seller and deducted from his payment.

Heifers - A \$100 flat fee will be charged to the seller and deducted from his payment.

SALE MANAGED BY: MARITIME BEEF TESTING SOCIETY

NOTE:* THE ABOVE TERMS AND CONDITIONS SHALL BE A CONTRACT BETWEEN THE BUYER AND SELLER OF EACH LOT**

BULLS

DEFINITIONS

ON TEST WEIGHT	The weight taken November 23, 2017, after the bulls completed the normal adjustment period and started on official test. (Recorded in pounds)												
OFF TEST WEIGHT	The weight on completion of test, that being the weight taken March 16, 2018. (Recorded in pounds)												
A.D.G. ON TEST	Total gain while on test divided by 112 days.												
RESIDUAL FEED INTAKE	<p>Residual feed intake (RFI) is a measure of feed efficiency. It is the difference between the expected feed intake of the animal based on its body weight and growth rate, and what they actually consume. More efficient animals eat less than expected and have a negative or low RFI. Less efficient animals eat more than expected and have a positive or high RFI.</p> <p>Heritability of RFI is about 40%, and is independent of other production traits. Selecting for lower RFI will decrease feed intake with no detrimental effects on growth or size of the animal.</p>												
YEARLING INDEX	<p>The adjusted yearling weight expressed as a percentage of adjusted yearling weight for all bulls on test of that breed.</p> <p>EXAMPLE: An index of 115 indicates that the bull had a yearling weight of 15 % above the average of all bulls of that breed.</p>												
AVERAGE FAT	The ultrasonic measurement of fat cover in millimeters and gives an indication of the relative fat cover on bulls in the sale. The average on the SALE BULLS is 6.2 mm so buyers can compare bulls to this average.												
SEMEN TESTING	All bulls in the sale have been semen tested and have passed.												
CALVING EASE SCORE	<p>A rating assigned by the breeder to indicate the ease of calving. Rating indicated by the following letters:</p> <table style="width: 100%; border: none;"> <tr> <td style="text-align: center;">U</td> <td style="text-align: center;">Unassisted</td> <td style="text-align: center;">M</td> <td style="text-align: center;">Mal Presentation</td> </tr> <tr> <td style="text-align: center;">E</td> <td style="text-align: center;">Easy Pull</td> <td style="text-align: center;">S</td> <td style="text-align: center;">Surgical</td> </tr> <tr> <td style="text-align: center;">H</td> <td style="text-align: center;">Hard Pull</td> <td style="text-align: center;">V</td> <td style="text-align: center;">Voluntary Pull</td> </tr> </table>	U	Unassisted	M	Mal Presentation	E	Easy Pull	S	Surgical	H	Hard Pull	V	Voluntary Pull
U	Unassisted	M	Mal Presentation										
E	Easy Pull	S	Surgical										
H	Hard Pull	V	Voluntary Pull										
RIB EYE	<p>The Rib Eye area gives an indication of overall carcass muscling. Rib Eye is measured using Real Time Ultrasound. The “scan” is taken at the grading site between the 12th and 13th ribs. Rib Eye area is an estimate of lean yield.</p> <p>LOW = 10 sq. in. and under Average = 10.1 sq. in. - 13.0 sq. in High = 13.1 sq. in. and up</p>												
MARBLING - % OF INTRAMUSCULAR FAT	<p>Marbling is an indication of intramuscular fat. Marbling is measured using Real Time Ultrasound. The “scan” is taken at the grading site between the 12th and 13th rib. The following table correlates the percentage of intramuscular fat to the Canadian Grading System.</p> <p>Single A (A) = 1.0 - 3.9 Double A (AA) = 4.0 - 4.9 Triple A (AAA) = 5.0 - 7.9 Canada Prime = 8.0 - 11.0</p>												
ESTIMATED PROGENY DIFFERENCE (EPD)	<p>An EPD (Expected Progeny Difference) is an estimated average number for a particular animal’s trait. Those traits are things like: birth weight; calving ease; weaning weight; yearling weight and maternal milk. EPDs are not absolute figures; they are estimates based on averages. EPDs are based on the animal’s own performance and pedigree records as well as those of its sire, grandsire, and siblings and of course, offspring.</p> <p>One thing to keep in mind is the EPDs can only be used to compare within breeds. Each breed has its own average values for EPDs.</p>												

Birth Weight EPD	A bull's birth weight EPD shows the expected difference in average birth weight (pounds) for his progeny. Positive values signify heavier than average birth weights for that breed whereas negative values signify lighter birth weights.
Calving Ease (CED) EPD	is expressed as percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers
Weaning Weight EPD	A weaning weight EPD shows the ability of the calf to grow between birth and weaning, expressed in pounds of gain.
Yearling Weight EPD	A yearling weight EPD value shows the ability of a bull's offspring to grow from birth to one year of age, expressed in pounds of gain.
Maternal Milk EPD	Maternal milk EPD is one that signifies the ability of a sire's daughter to provide the calf with milk and mothering ability expressed as pounds of calf at weaning time.
TOTAL MIXED RATION	Indicates the bulls were fed on a Total Mixed Ration (silage based) purchased from Agriculture & Agri-Food Canada.

Consignor Comments:

Likely homo polled and homo black. We love these Angus/Simm Bulls – are consistent & work well on all types of cows. Will sire a great set of steers and top replacement females.

Dam: Charolais
Tattoo: 16E
Birth Date: Feb 6/17
Sale Weight:
Breeding Status: Open

Consignor: Golden Brook Farms- Ken & Bonnie Langille- 902-257-2925
This dam has been a favorite for many years in our cow family. Plenty of milk and great disposition. Don't miss this heifer.

Lot/Tag #: H16
Pedigree: Charolais
Sire: Cornerview Allstar 12A
Dam: Charolais 134X
Tattoo: 17E
