

# Livestock Price Insurance- Eastern Version

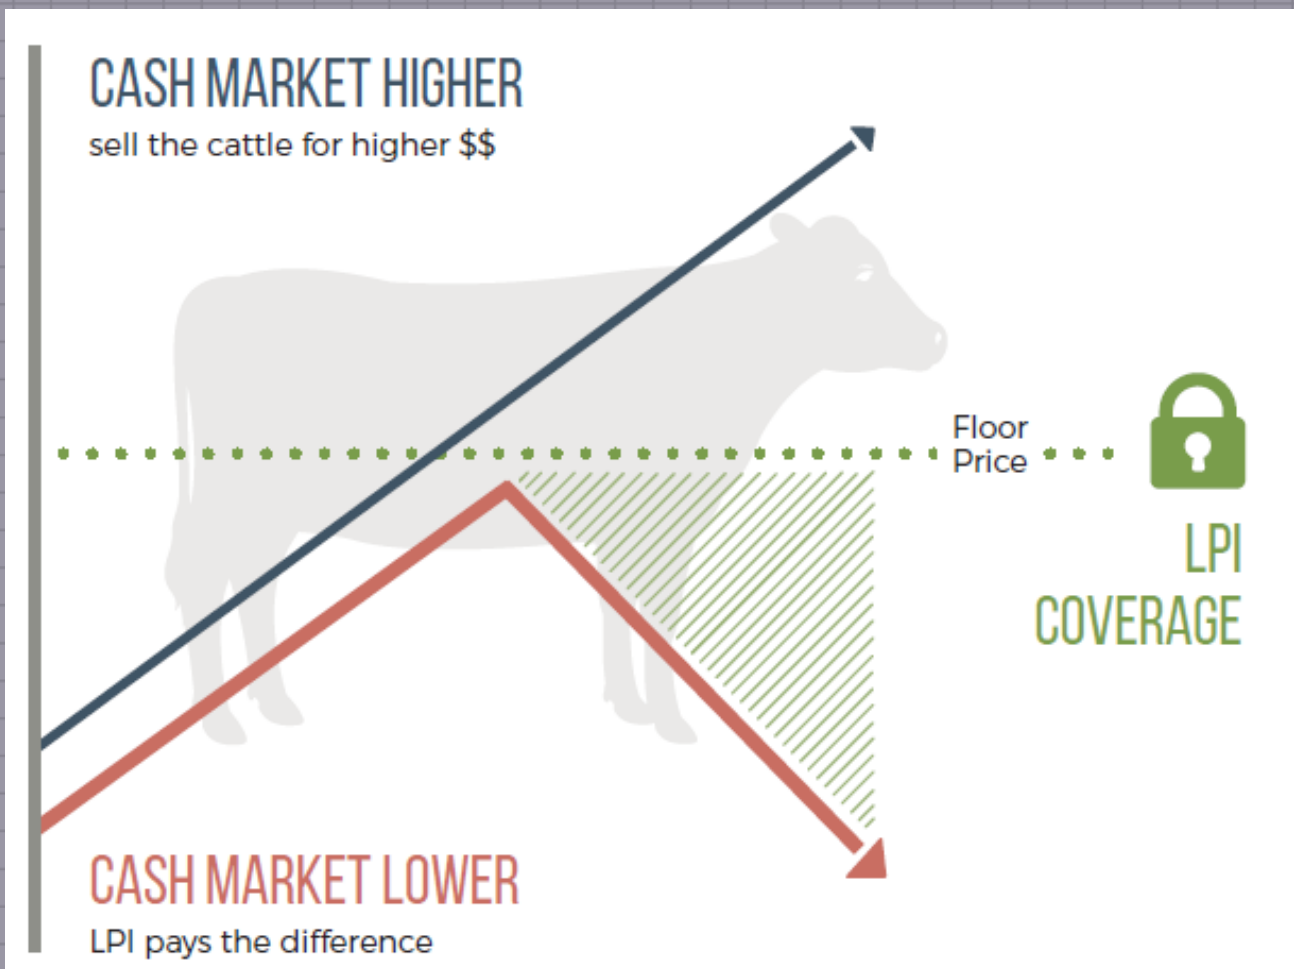

How do you manage market risk on your beef calves?

How about Feeders you are backgrounding? Fat Cattle?

**Would you like to be able to insure against market drops?**

This is a program that would be eligible for producers small and large to utilize! Insure the market risk on one calf or 1000.

Sleep better at night, it's insurance. If the market ends up stronger than your insured value- that's a good news story.
